PROFILE

Cybersecurity professional and CyberOps mentor with practical experience in web application security, vulnerability assessment, networking, and cybersecurity training. Experienced in mentoring learners, delivering technical workshops, and supporting CyberOps programs. Currently developing practical skills in AWS Cloud, cloud security, DevOps, CI/CD, and DevSecOps.

CORE EXPERTISE

WEB SECURITY

Web application testing, vulnerability assessment, API security, WordPress security

CYBEROPS

Security operations fundamentals, network traffic analysis, security validation

NETWORKING

TCP/IP, routing & switching fundamentals, troubleshooting, Cisco networking

TOOLS

Burp Suite, Wireshark, Nmap, tcpdump, Linux security tools

CLOUD

AWS fundamentals, cloud infrastructure & cloud security — currently learning

DEVOPS

Git/GitHub, Jenkins, Ansible, CI/CD — currently learning

CERTIFICATIONS

- Cisco Certified CyberOps Associate
- Cisco CCNA
- EC-Council Ethical Hacking Essentials (EHE)
- Penetration Testing Engineer — Alison
- Moboroid Certificate of Appreciation — Website Security Assistance
- Moboroid Hall of Fame — Security Contribution / Recognition

TRAINING & MENTORING

- CyberOps & cybersecurity instruction
- Cybersecurity awareness sessions
- Network security fundamentals
- Student career & course guidance
- Practical workshops, webinars & bootcamps
- Teacher / instructor cybersecurity training

PROFESSIONAL EXPERIENCE

Academy Resources & Support Center (ARSC)

CyberOps Instructor / Cybersecurity Mentor / Program Support

Cisco Support Center, AJK Region • ~16 months

- Delivered Cisco CyberOps, cybersecurity fundamentals, and network security training.
- Mentored students on cybersecurity courses, career paths, and professional development.
- Conducted technology-awareness sessions through KTA and supported schools/colleges across Mirpur.
- Supported training activities through SCO freelancing hubs, KORT, TEVTA, and NUML University.
- Contributed to the Cisco Cyber Cup as Program Manager / workshop contributor and served as Team Captain.
- Supported CyberOps learning through classes, webinars, bootcamps, and practical technical activities.

Web Application Security / Penetration Testing

Cybersecurity Practitioner

- Conduct authorized security testing of web applications and APIs.
- Perform reconnaissance, technology identification, vulnerability assessment, and validation.
- Test authentication, authorization, APIs, WordPress applications, and web functionality.
- Document findings with evidence, reproduction steps, impact, and remediation guidance.

Network and Telecommunication Centre (NTC)

Network Intern • 3-Month Internship

- Gained practical exposure to networking concepts, infrastructure, and troubleshooting.
- Developed understanding of network communication and common networking technologies.

SELECTED PRACTICAL WORK

- Web Application Security: Authorized testing of authentication, authorization, APIs, input handling, and application functionality.
- WordPress Security Research: Research of plugins, REST APIs, authentication/authorization mechanisms, and security controls.
- CyberOps Labs: Practical network traffic analysis and cybersecurity exercises using Wireshark, Nmap, and tcpdump.
- AWS & DevOps Learning: Hands-on learning in AWS fundamentals, Linux, Git/GitHub, Jenkins, Ansible, CI/CD, and DevSecOps concepts.

RECOGNITION

- Cisco / NetAcad Cyber Cup — EMEA Region: Team Captain; SCO Software Technology Park academy team reached Top 5 / semi-final stage.
